Two new evaluation tools for your Leak detector LD 500

Leak detector LD 500

What are the advantages of...

... the CS Leak Reporter V2 (Desktop version):

- Paperless documentation according to ISO 50001
- More user-friendly interface
- Improved guidance through instructions in the software
- More comfortable data import from the LD 500
- Project data set in the LD 500 is also imported into the software
- Create your own database of measure, leaking elements and spare parts and import them to the LD 500

... the CS Leak Reporter Cloud Solution:

Same features as the Leak Reporter V2 in addition to:

- Ideal for service providers in the field of leak detection as well as companies with multiple locations
- One central database for all users
- Data access independent from location and hardware
- Increased data security through automatic backup in the cloud
- User and role management to give different rights and data access to different persons
- No installation required - Login with email and password
- No IT support needed
