### 2 Safety instructions

#### About this document

- Read this documentation carefully and familiarize yourself with the product before using it. Pay particular attention to the safety and warning instructions to prevent injury and product damage.
- Keep this documentation handy for future reference.
- Share this documentation with future users of the product.

#### 2.1 General safety instruction

#### 2.2 Using of class 2 laser

	<ul> <li>Never point the laser directly towards persons!</li> </ul>			
	• Absolutely avoid a direct irradiation of the eves of humans and animals!			
	If a norcen's even are even and to class 2 losser radiation, they should shut their			
	• If a person's eyes are exposed to class 2 laser radiation, they should shut their			
	eyes and immediately move away from the beam			
	<ul> <li>Do not stare into the beam</li> </ul>			
	$\sim$ Lease module, corresponde to DIN EN COOSE 1, 2014 Class 2 / (1m) / CSE mm)			
	<ul> <li>Laser module: corresponds to DIN EN 60825-1: 2014 Class 2 (&lt;1mW / 635nm)</li> </ul>			
<b>^</b>	Laser output point trumpet and parabolic mirror:			
	Harris CE			
	Lasor output point			

#### **3** Service and maintenance

Service and maintenance work must only be carried out by authorized personnel.

#### 4 Environmental protection

- Disposal of defective batteries / dead batteries according to the valid legal regulations.
- After the end of the useful life, take the product to the separate collection for electrical and electronic equipment (observe local regulations) or return the product to CS Instruments GmbH & Co.KG for disposal.

**CS Instruments GmbH & Co.KG** makes no warranty as to its suitability for any particular purpose and assumes no liability for any errors contained in this manual. Nor for consequential damages in connection with the delivery, performance or use of this device.

#### The following accumulator is contained in this electrical appliance

Battery type	Chemical system
Akkumulator	LiIon 2S1P

#### Information on the safe removal of the batteries or accumulators

- Warning: Make sure that the battery is completely empty.
- Removing the battery

Removing the battery cover

Disconnecting the connector

Carefully pull out the battery

- Carefully remove the accumulator
- The accumulator and the appliance can now be disposed of separately

#### 5 Intended use

The LD 450 is a leak detector for quick and reliable leak detection in/on compressed air systems.

It is solely designed and constructed for the intended use described here and may only be used for this purpose.

The user must verify that the device is suitable for the intended use. The technical data listed in this datasheet are binding.

Improper handling or operation outside the technical specifications is not permitted. Claims of any kind for damages arising from improper use are excluded.

#### 6 Technical data LD 450

263 x 96 x 280 mm (with preamp module and acoustic
trumpet)
0.55 kg with preamp module and acoustic trumpet,
complete set in case approx. 3.0 kg
40 kHz (+/-2 kHz)
Internal 7.4 V lithium-ion battery
> 9 h (continuous operation)
ext. battery charger (included in scope of delivery)
max.4 h
Wavelength 630–660nm, output power < 1mW
(laser class 2)
3.5 mm stereo jack for headset,
Power supply socket for connecting an external charger
USB connection
3.5" touch panel TFT transmissive
USB for SW update.
Indoor use
-5 °C bis +50 °C
-20 °C to +60 °C
Up to 4000m above sea level
<95% rH, without condensation
2
IP20

# 7 Identification

#### 7.1 Name plate

#### 7.2 Laser warning label

#### 7.3 Label positions

#### 8 Device components and controls

#### 8.1 The LD 450

# 9 Overview and application description of the different sensor types

Acoustic trumpet (standard tool)	Straightening tube
The acoustic trumpet bundles incident ultrasonic waves, thereby extending the range of the device. This behaviour makes it ideal for medium distances. The leakage can be heard from large distances, for precise detection, the user must approach the leakage and consistently follow the "loudest" point. Individual compressed air components are then checked for precise detection. Quantification distance (distance) $\Box$ 1 – 6 m <b>Use of acoustic trumpet:</b> • Average distance to pipe/component 0.2 - 6 m • Low interfering noise • Leakage freely accessible	The straightening tube permits only very few ultrasonic waves to pass in the direction of the ultrasonic transducer, allowing leakages to be located very precisely. For this reason, the use of the straightening tube is recommended for small distances, for the precise detection of the corresponding leakage. <b>Quantification distance:</b> 00,2 m <b>Use of focus tube:</b> • Short distance to pipe/component 0.05 m • Pipe/component freely accessible • Pipes and components to be inspected are very close together

# 10 Start-up / / Application LD 450

#### 10.1 Switch on

Hold down the power button for about 1 second, the power will turn on, and a start-up sequence will appear on the display. Pressing the button again switches the device off again.

On-Off button, see device components and controls

#### 10.2 Headphone Volume Up / Volume Down

The volume up and volume down buttons in the headset can be increased or decreased in 16 steps. Continuously pressing the button automatically increases / decreases the value.

Volume up / down buttons for headphone volume, see device components and controls

# Please make sure the headphone level is <50% before putting on the headphones.

#### 10.3 Sensitivity level

Ultrasound levels can be understood as a "loudness" of the leakage.

With the "Sensitivity" button, the sensitivity of the LD 450 can be adjusted to the environment, which strongly influences the acoustic behaviour of the device and increases or decreases the valid value range. A reduction in sensitivity reduces the range of the leakage.

#### Sensitivity levels

**0** – **60 dB** = Highest sensitivity level of the device (use with small leaks and no noise), selection with the "*HiSn*" button or the "*Sensitivity*" button

10 – 70 dB = Leakages and noises get "less noisy", the range is reduced.

**20 – 80 dB** = Leakages and noises get "less noisy", the range is reduced.

**30 – 90 dB** = Leakages and noises get "less noisy", the range is reduced.

40 – 100 dB = Most insensitive stage (large leaks, many noises  $\rightarrow$  for heavy-duty application)

#### 10.4 Laser On/Off

The laser pointer can only be switched on by pressing the laser on / off button. When switched on, the display shows a laser warning symbol.

Please note the warnings for laser operation! Avoid direct / indirect (via reflexion) irradiation of the eyes in humans and animals!

# **11 Operation**

The operation is largely self-explanatory and menu-driven via the touch panel. The selection of the respective menu items occur via short "tapping" with the finger or a soft round pen.

#### <u>Attention</u>: Please use no pens or other objects with sharp edges! The foil can be damaged!

#### 11.1 Initialization

#### 11.2 Screen Leckage

The following picture shows and describes the display elements.

Power supply connected and battery is charging:

#### 11.3 ^Settings menu LD 450

The operation is largely self-explanatory and menu-driven via the touch panel. The selection of the respective menu items occur via short "tapping" with the finger or a soft round pen.

#### <u>Attention</u>: Please use no pens or other objects with sharp edges! The foil can be damaged!

Before the leakage search is started, the device must be configured. The user can access the menu by clicking the "Settings" button. The following figure shows the Settings "Menu".

#### 11.3.1 Language

#### Settings → → Set language

#### 11.3.2 Date & Time

Home  $\rightarrow$  Settings  $\rightarrow$  Device settings  $\rightarrow$  Date & Time

#### 11.3.3 System settings

#### 11.3.3.1 System update

If required, there is the possibility for the LD 450 to download a firmware update to the device via the USB stick. The latest software is available on the CS Instruments GmbH homepage

The received file must then be stored on the USB stick and transferred to your device as described below.

#### Settings → System → System-Update

*** Update System ***		
Check USB Stick for new Softwate updates		
act. SW = V99.88	Ch.Vers.	
SoftwareV99.88LanguagesV0.83ChSW Pwr.V0.22ChSW Com.V0.23BluetoothV0.22BootloaderV99.88	P1: V033 C1 I1	
Update selections force all	Update Kanäle	
Back		

#### 11.3.3.1.1 Check for Updates

Home → Settings → Device settings → System-Update → check USB-Stick for new Updates

If it is required to install an older software version, you have press the button "Force all"

# 11.3.3.2 Reset to default settings

#### Settings → System → Reset to Defaults

*** System Settings ***
Reset all Settings to Factory-Default ?
Yes No
Back
*** System Settings ***
Update System
Reset to Defaults
Reboot System
Unique USB ID

If needed with *"Reboot System"* the LD 450 could be started(reboot) here.

#### 11.3.4 Calibration of touchpanel

#### Home $\rightarrow$ Settings $\rightarrow$ Device settings $\rightarrow$ calibrate touchscreen

	-
*** Touchscreen calibration ***	
Please check position, press Calibrate if necessary	If necessary, the touch-screen calibration can be changed here.
Calibrate [400/240] <52685/52685> Y=1.048-4800 XO=1.172-2700 XU=1.172-2700	Push <i>Calibrate</i> and it appears, 1. left above,2. bottom right, 3. bottom left, 4.right above and 5. in the middle, a calibration cross that must be pushed consecutively.
OK Cancel	If the calibration finished positive a message <i>"Calibration successful"</i> appears and have to be confirmed with <i>OK</i> .
mark center of each cross	Is this not the case, so you can repeat the calibration with the help of the Cancel and <i>Calibrate</i> button.
[175/130] <17660/17245> Y=1.048-4800 XO=1.172-2700 XU=1.172-2700	
Cancel	

#### 11.3.5 Set backlight brightness

Home → Settings → Set backlight

*** Pool-light optimus ***	
Backlight 39%	Here you adjust the desired <i>Backlight</i> (15-100%) of the display directly. E.g. <i>Backlight</i> to 39 %
Back 12.02.2018 09:29:24	
*** Packlight addings ***	With the help of the Backlight dimming after
Backlight 39%	button, after a definable time interval (here after 15 minutes), the <i>Backlight</i> can be reduced to the minimum.
Backlight dimming after 15 minutes Backlight off after 1 minutes Back 09:29:49	As soon as the dimmed screen is operated again, the <i>Backlight</i> is committed automatically on the last set value before dimming.
the Desidient estimate the	
Backlight 39%	To reduce the energy consumption (device runtime), you can switch off the display backlight by setting <b>"Backlight off after".</b>
Back	

#### Remark:

At the first touch, the *Backlight* in our example is reset to 39%, after that a "normal" function operation is possible.

#### Important:

If the *Backlight dimming after* button is not activated, then the *Backlight* stays permanently on, in the currently set brightness.

#### 11.3.6 Cleaning

#### Home → Settings → Cleaning

This function can be used for cleaning the touch panel during running measurements.

If one minute is not enough time to clean, the process can be repeated at any time.

Is the cleaning faster finished, then you can push the *to abort press long* button (for one or two seconds) to cancel.

#### 11.3.7 About LD 450

Brief description of the Hardware and Software Version, as well as the Serial Number of the LD 450.

Under options, you can buy four additional, different functions, if you have not done this by ordering.

### **12** Charging the batteries

The battery is charged within the device. For this, the supplied plug-in power supply is connected to the built-in charging socket of the LD 450 and the 230V socket.

The LD 450 checks the charging status of the battery and starts the charging process automatically if necessary.

To protect the Li-ION accumulator of exhaustive discharge the device is switching off automatically if a cell voltage of 6,4V will be reached.

# 13 Scope of delivery

LD 450 is available either as a single unit or in a set. The set contains all the components and accessories that are protected in a rugged and shock-resistant transport case.

The following table lists the components with their order numbers.

Description	Order No.
Set LD 450 consisting of:	0601 0204
LD 450 leak detector with acoustic trumpet, and integrated camera, 100 leak tags for marking the leakages on site	0560 0204
Sound-proof headset	0554 0104
Focus tube with focus tip	0530 0104
Accustic trumpet	0530 0109
Battery charger(AC adapter plug)	0554 0009
Transportation case	0554 0106

#### 14 Appendix

In the appendix on the following pages you will find the Declaration of Conformity for the electromagnetic compatibility and the Test Report of the Li-ion batteries used.

Lithium cells or batteries test summary according to UN38.3

Test results in accordance with the UNITED NATIONS "Recommendations on the TRANSPORT OF DANGEROUS GOODS" Manual of Test and Criteria ST/SG/AC.10/11 Rev.6, Amend. 1, 38.3. Cell manufacturing as well as battery assembly is done under the quality assurance program of ISO9001.

This document remains valid as long as no changes, modifications or additions are made to the model(s) described in this document. The model(s) has (have) been classified according to the applicable transport regulation and the UN Manual of Test and Criteria as of the date of the certification. The model(s) must be packed, labelled and documented according to country and other international regulations for transportation.
